
A.L.T. SAWS AND SPARES LTD

PART NUMBER ALTRG1 – UPPER = £149.50+vat

These precision roller guides are manufactured in the UK specifically to replace the GL & GSP
Basic Upper Roller Guides
Which are used on most European Band Saw models

Manufactured in steel and aluminium, these guides will make a very good saw even better, they
give superb blade control have low heat generation to the blade and produce no sparks.

There is NO drilling, filing or any modification required
Just remove the old guide complete just leaving the
Original guide spigot in the tool post,
Fit the new roller guide to the original guide spigot,
Lock off with the supplied set screw

Both side support rollers and thrust roller are adjusted by a cam system giving precision setting
longer, and allows full contact to the blade, this eliminates any blade twist, cutting contours will
particularly appreciate the blade control.

Supplied as the upper set as this takes on 80% of the work.
Suitable for blade widths from 6mm to 32mm
