PART NUMBER STRG – UPPER = £95.00+vat
 PART NUMBER STRG – LOWER = £90.00+vat

These precision roller guides are manufactured in the UK specifically for the older Startrite models 301 – 351 - 352, refer to the chart below for all models and recommended blade widths.

There is NO drilling, filing or any modification required unlike many cheap after market guides currently on the market.

Manufactured in steel and aluminium, these guides will make a very good saw even better, they give superb blade control have low heat generation to the blade and produce no sparks.

Both side support rollers and thrust roller are adjusted by a cam system giving precision setting longer, and allows full contact to the blade, this eliminates any blade twist, cutting contours will particularly appreciate the blade control.

Although available as upper and lower guide assemblies some customers may only wish to change the upper set as this takes on 80% of the work.
